More detailed information on waste sorting and recycling in the Czech Republic can be found at [www.jaktridit.cz/en](http://www.jaktridit.cz/en)

# HOW TO SEPARATE WASTE CORRECTLY IN PRAGUE?

**PAPER**

Please, disassemble paper boxes!  
We do not separate oily, wet or very dirty paper.

**MULTI WASTE COLLECTION**  
PLASTIC BEVERAGE CARTONS

Please, compress plastic bottles! Do not separate plastic packaging contaminated with food residues, chemicals and other substances.

**GLASS**

You don't have to wash glass before separating it, nor remove labels and lids. Throw in all glass regardless of its colour.

**METAL**

Please, crush the empty cans before separate! Packaging contaminated with food residues or chemicals should not be recycled!

**ORGANIC WASTE**

PLEASE DO NOT THROW in bags!

**RESIDUAL WASTE**

Residual waste is no longer sorted!

**In Prague, we separate waste into recycling bins of different colours. Therefore, always follow the instructions on the stickers placed on the containers.**

## TIPS ON HOW TO SEPARATE WASTE CORRECTLY - WHAT YOU SHOULDN'T FORGET

1. Always follow the instructions on the labels placed on the containers, as they take into account the specifics of waste recycling.
2. The used packaging you sort must not contain product, food or drink residues.
3. It is important to reduce recyclable waste before sorting (by flattening, crushing, or compacting it). This way, more waste can fit into the recycling containers, which may affect the frequency of collection. This helps save money that Prague must spend on waste disposal and reduces the environmental impact.

## GOOD TO KNOW...

Your recyclables do not need to be perfectly clean - you do not have to wash them, it is enough to use up the content or to wipe it clean with a paper towel. You do not have to remove any lids and labels.
